World Green Design Forum – Brussels Summit

世界绿色设计论坛–布鲁塞尔峰会

18–19, October 2013
Brussels, Belgium

World Green Design Forum (WGDF) is the first and only worldwide dialogue platform that focuses on global sustainability issues from the perspective of Green Design. Designing, as the initial stage of all products' life cycle, determines the products' environmental footprints in the world. Green transportation, Green building, Green Office, such widely discussed issues cannot be addressed without mentioning the designing stage. WDFG brings together political leaders, delegates from academic/R&D field, NGOs, and business leaders from various sectors to share visions, insights and know-hows, and thereby contributes to a green economy and a more sustainable world.

The World Green Design Forum is founded under the guidance of Mr Lu Yongxiang, vice-chairman of the 11th National People's Congress of China and the former president of the Chinese Academy of Sciences.
